

Spazio Milestone 3 - API Requirements & Integration Guide

****Date**:** April 2026

****Project**:** Spazio (spaziocrypto.com)

****Scope**:** For pages already designed in Figma (Homepage, Article, Blog, About Us, Advertising, Careers, Imprint)

****Status**:** API requirements for live launch checklist

Overview

This document outlines all API integrations required to complete Milestone 3 for the **7 designed pages**. Pages not yet designed in Figma (Directory, Crypto Jobs, Events, Press Releases, Crypto Prices page, Tag pages) are excluded from this scope.

Integration Status Summary

API	Status	Page Usage	Priority
-----	-----	-----	-----
Ghost Content API	■ Ready	All pages	Critical
Ghost Members API (Paywall)	■ Needs activation	Article page	High
Newsletter Subscription	■ Needs wiring	Homepage, footer	High
Contact Forms (Formspree)	■ Configured	Advertising, Careers	Medium
Multilingual Routing (Cloudflare)	■ Configured	All pages	Medium
OneSignal (Push Notifications)	■ Configured	Global	Low
Trustpilot (Social Proof)	■ Optional	Homepage	Low

1. Ghost Content API (Read-Only)

Status: ■ **Already Implemented**

Purpose

Fetch all published content (articles, pages, tags, members, comments) for the frontend.

Configuration

- **URL:** `http://localhost:2368/ghost/api/v3/content/``
- **Authentication:** API Key (read-only)
- **Rate Limit:** Unlimited locally, 5000 req/day on Ghost Pro

Usage by Page

Homepage

```
// Fetch featured posts (for hero section) GET
/ghost/api/v3/content/posts/?key=YOUR_API_KEY&filter;=featured:true&limit;=5 // Fetch latest posts (for
feed) GET /ghost/api/v3/content/posts/?key=YOUR_API_KEY&limit;=10■=published_at%20desc
```

Article Page

```
// Fetch single article by slug GET
/ghost/api/v3/content/posts/slug/{slug}/?key=YOUR_API_KEY&include;=authors,tags // Fetch related
articles (by tag) GET /ghost/api/v3/content/posts/?key=YOUR_API_KEY&filter;=tag:{tag-slug}&limit;=3
```

Blog Listing Page

```
// Fetch all posts with pagination GET
/ghost/api/v3/content/posts/?key=YOUR_API_KEY&limit;=12&page;=1&include;=tags
```

About Us / Imprint

```
// Fetch static pages by slug GET /ghost/api/v3/content/pages/slug/about/?key=YOUR_API_KEY GET
/ghost/api/v3/content/pages/slug/imprint/?key=YOUR_API_KEY
```

Advertising/Media Kit

```
// Fetch media kit page GET /ghost/api/v3/content/pages/slug/media-kit/?key=YOUR_API_KEY
```

Careers

```
// Option 1: Static page GET /ghost/api/v3/content/pages/slug/careers/?key=YOUR_API_KEY // Option 2:
Posts tagged as jobs GET /ghost/api/v3/content/posts/?key=YOUR_API_KEY&filter;=tag:jobs
```

Implementation Checklist

- ☐ Verify API key in Ghost admin (Settings → Integrations → Content API)
- ☐ Test all endpoints locally
- ☐ Implement caching (5-10 min TTL) to reduce calls
- ☐ Handle errors gracefully (fallback UI)
- ☐ Ensure featured images load correctly
- ☐ Test with 9 language variants

2. Ghost Members API (Paywall)

Status: ■ **Needs Activation**

Purpose

Implement free vs. paid article paywall based on membership status.

Configuration

- **URL:** `http://localhost:2368/ghost/api/v3/members/`
- **Authentication:** Member session token (stored in browser)
- **Requires:** Ghost Members feature enabled

Article Page Integration

Check if user is member

```
// Detect current member status GET /ghost/api/v3/members/me/?key=YOUR_API_KEY // With token in headers
Headers: { Authorization: `Ghost ${memberToken}` }
```

Render paywall content

```
// If member.status === 'paid': // Show full article content // If member.status === 'free' || null: //
Show excerpt only + paywall CTA // Display: "Subscribe to read full article" button
```

Template Logic (Handlebars)

```
{{#post}} {{#if access}} <!-- Full article for members --> {{html}} {{else}} <!-- Free excerpt for
non-members --> {{excerpt}} <div class="paywall-cta"> <p>{{t "subscribe_to_read_full"}}</p>
{{subscribe_button}} </div> {{/if}} {{/post}}
```

Email Access

```
// When user clicks "Subscribe" button POST /ghost/api/v3/members/ { "members": [{ "email":
"user@example.com", "name": "User Name", "labels": ["newsletter"] }] }
```

Implementation Checklist

- [] Enable Members feature in Ghost settings
- [] Configure subscription tiers (free/paid plan)
- [] Implement Handlebars access checks in article template
- [] Style paywall CTA section
- [] Test paywall on article page (free & paid versions)
- [] Verify subscription email flow works
- [] Dark mode styling for paywall

3. Newsletter Subscription Integration

Status: ■ **Needs Wiring**

Purpose

Allow users to subscribe to newsletter from homepage, articles, footer.

Options

Option A: Ghost Members (Built-in)

Simplest - subscribe directly to Ghost Members list

```
// Frontend form submission POST /ghost/api/v3/members/ { "members": [{ "email":  
"subscriber@example.com", "name": "Subscriber Name", "subscribed": true }] }
```

Pros: No external service needed, integrated with paywall

Cons: Limited email features

Option B: Mailchimp

More features - email campaigns, automation, segmentation

```
// Frontend form submits to backend POST  
https://api.mailchimp.com/marketing/v3.0/lists/{list-id}/members/ { "email_address":  
"subscriber@example.com", "status": "pending", "merge_fields": { "FNAME": "First", "LNAME": "Last" } }
```

Requires: Mailchimp API key + list ID

Pros: Advanced email features, automation

Cons: External dependency

Option C: Substack

Best for writing-heavy - use Substack for newsletters, Ghost for articles

```
// Redirect to Substack subscribe form <iframe src="https://spazio.substack.com/embed" ...></iframe>
```

Pros: Dedicated newsletter platform

Cons: Separate from Ghost content

Implementation (Recommended: Ghost Members)

HTML Form

```
<form id="newsletter-form" class="newsletter-subscribe"> <input type="email" name="email"
placeholder="Your email..." required> <input type="text" name="name" placeholder="Your name" optional>
<button type="submit">Subscribe</button> </form>
```

JavaScript Handler

```
document.getElementById('newsletter-form').addEventListener('submit', async (e) => { e.preventDefault();
const email = e.target.email.value; const name = e.target.name.value; try { const response = await
fetch('/ghost/api/v3/members/', { method: 'POST', headers: { 'Content-Type': 'application/json' }, body:
JSON.stringify({ members: [{ email: email, name: name, subscribed: true }] }) }); if (response.ok) {
showSuccess('Check your email to confirm subscription'); } else { showError('Subscription failed. Try
again. '); } } catch (error) { showError('Error: ' + error.message); } });
```

Form Locations

- [] **Homepage**: Subscribe widget in hero section
- [] **Homepage**: Call-to-action section
- [] **Article page**: Newsletter signup below article
- [] **Footer**: Newsletter subscription widget (across all pages)
- [] **Blog listing**: Newsletter section between post grid

Implementation Checklist

- [] Choose subscription method (Ghost Members recommended)
- [] Create subscribe form in HTML
- [] Implement JavaScript submission handler
- [] Add success/error message UI
- [] Style form across all pages
- [] Test email confirmation flow
- [] Dark mode styling
- [] Mobile responsive testing

4. Contact Forms (Formspree)

Status: ☒ **Already Configured**

Configuration

- **Service:** Formspree
- **Endpoint:** ``https://formspree.io/f/xwkdojlk``
- **Setup:** Already in ``page-contact-us.hbs``

Usage

Advertising/Media Kit Page

```
<form action="https://formspree.io/f/xwkdojlk" method="POST"> <input type="email" name="email" required>
<input type="text" name="subject" placeholder="Inquiry type"> <textarea name="message" placeholder="Your
message..." required></textarea> <button type="submit">Send Inquiry</button> </form>
```

Careers Page

```
<form action="https://formspree.io/f/xwkdojlk" method="POST"> <input type="text" name="name"
placeholder="Your name" required> <input type="email" name="email" required> <input type="file"
name="resume" accept=".pdf,.doc,.docx"> <textarea name="message" placeholder="Cover letter..."
required></textarea> <button type="submit">Submit Application</button> </form>
```

Implementation Checklist

- ☐ Verify Formspree endpoint in both pages
- ☐ Test form submission
- ☐ Verify email delivery
- ☐ Style form to match theme
- ☐ Add success/error messages
- ☐ Implement spam protection (honeypot)
- ☐ Dark mode styling

5. Multilingual Routing (Cloudflare Worker)

Status:  **Already Configured**

Configuration

- **Service:** Cloudflare Worker
- **URL:** `https://spazio-multilang.ghostflow.workers.dev/``
- **Purpose:** Route requests to correct language version
- **Languages:** 9 supported (en, de, es, fr, it, ja, ko, ru, zh)

How It Works

User visits: `https://spaziocrypto.com/article-slug` ↓ Cloudflare Worker checks: - Accept-Language header
- User's previous language choice - URL language prefix ↓ Routes to:
`https://spaziocrypto.com/{lang}/article-slug` ↓ Frontend renders in selected language

Implementation Checklist

- ☐ Verify Cloudflare Worker is deployed
- ☐ Test language switching on all pages
- ☐ Verify language persistence (localStorage)
- ☐ Test Accept-Language header detection
- ☐ Verify translated content loads correctly
- ☐ Test language switcher component (header/footer)

6. OneSignal (Push Notifications)

Status:  **Already Configured**

Configuration

- **Service:** OneSignal
- **App IDs Configured:** 9 language variants (en, de, es, fr, it, ja, ko, ru, zh)
- **Setup:** Configured in Ghost Admin (Settings → Integrations → OneSignal)

Usage

Subscribe User to Notifications

```
// On page load, if user opts in OneSignal.push(function() {  
OneSignal.addEventListener('subscriptionChange', function(isSubscribed) { console.log("User subscribed:  
" + isSubscribed); }); }); // Request notification permission OneSignal.push(() => {  
OneSignal.requestPushPermission().then(() => { console.log('Push permission granted'); }); });
```

Send Notification (from Ghost admin)

When publishing new article: 1. Ghost publishes post 2. OneSignal webhook triggered 3. Push notification sent to all subscribers 4. Notification links to new article

Implementation Checklist

- ☐ Verify OneSignal is loaded on all pages
- ☐ Test push notification permission prompt
- ☐ Test notification delivery (publish test article)
- ☐ Verify notification click tracking
- ☐ Test notification delivery per language
- ☐ Verify dark mode support

7. Trustpilot Integration (Optional)

Status: ■ **Optional for Milestone 3**

Configuration

- **Service:** Trustpilot
- **Use Case:** Display customer reviews/ratings on homepage
- **URL:** `https://www.trustpilot.com/review/spaziocrypto.com`

Implementation (if included)

Trust Section Widget

```
<div class="trust-section"> <!-- Option A: Trust badge (embedded) --> <iframe  
src="https://widget.trustpilot.com/..." /> <!-- Option B: Star rating display --> <div  
class="star-rating"> <span class="stars">★★★★★</span> <span class="rating">4.8 out of 5</span> </div>  
</div>
```

JavaScript Loading

```
// Load Trustpilot script if not already present if (!window.Trustpilot) { const script =  
document.createElement('script'); script.src = 'https://cdn.trustpilot.net/TrustboxAPI.js';  
document.body.appendChild(script); }
```

Implementation Checklist

- ☐ Decide if Trustpilot is needed for Milestone 3
- ☐ Embed trust widget/badge
- ☐ Style to match homepage design
- ☐ Test loading and rendering
- ☐ Dark mode compatibility
- ☐ Mobile responsive styling

8. Required Configurations by Page

Homepage

- ☐ Ghost Content API (featured posts, latest posts)
- ☐ Newsletter subscription form
- ☐ Trust section (if included)
- ☐ Language switcher
- ☐ Push notification opt-in (optional)

Article Page

- ☐ Ghost Content API (single post + related articles)
- ☐ Ghost Members API (paywall logic)
- ☐ Newsletter subscription form
- ☐ Social share buttons (native JavaScript)
- ☐ Comments section (Ghost native)

Blog Listing Page

- ☐ Ghost Content API (post list with pagination)
- ☐ Newsletter subscription widget
- ☐ Tag filters (Ghost native)
- ☐ Language switching

About Us Page

- ☐ Ghost Content API (page content)

Advertising/Media Kit

- ☐ Ghost Content API (page content)
- ☐ Formspree contact form
- ☐ Language switching

Careers Page

- ☐ Ghost Content API (page content + job listings)
- ☐ Formspree application form
- ☐ Language switching

Imprint Page

- ☐ Ghost Content API (page content)

Testing Checklist

API Connectivity

- ☐ Test all Ghost Content API endpoints
- ☐ Test Ghost Members API authentication
- ☐ Test Newsletter subscription submission
- ☐ Test Formspree form submission
- ☐ Test language routing (Cloudflare Worker)
- ☐ Test OneSignal configurations

Performance

- ☐ API responses < 500ms
- ☐ Implement caching (5 min TTL for posts)
- ☐ Lazy load external scripts (Trustpilot, OneSignal)
- ☐ Monitor API call frequency (avoid rate limits)

User Experience

- ☐ Form validation (email format, required fields)
- ☐ Error handling (show user-friendly messages)
- ☐ Loading states (show spinners while fetching)
- ☐ Success feedback (confirmation messages)
- ☐ Mobile testing (all forms responsive)

Security

- ☐ No API keys exposed in frontend code
- ☐ Form CSRF protection
- ☐ Input validation and sanitization
- ☐ HTTPS only (no HTTP calls)
- ☐ Rate limiting on forms

Internationalization

- ☐ Newsletter/contact forms work in all 9 languages
- ☐ Error/success messages translated
- ☐ Language switcher functional on all pages
- ☐ Date/number formatting per locale

Dark Mode

- ☐ All forms styled correctly in dark mode
- ☐ Input fields readable in both modes

- ☐ Buttons contrast sufficient
- ☐ Links visible in both modes

Implementation Priority

Phase 1 (Critical - Required for Launch)

1. Ghost Content API testing + caching
2. Newsletter subscription wiring (all pages)
3. Ghost Members API paywall testing
4. Formspree form testing

Phase 2 (High - Before Staging)

1. Language switching verification
2. Form styling + dark mode
3. Error/success message implementation
4. Mobile responsive testing

Phase 3 (Medium - Polish)

1. Performance optimization
2. Push notification testing
3. Trustpilot (if included)
4. Analytics integration

Backend Service Endpoints

All these APIs are called from the frontend (Handlebars templates or JavaScript). No additional backend service required for these integrations.

Local Testing

```
# Ghost Backend http://localhost:2368 # API Endpoints http://localhost:2368/ghost/api/v3/content/  
http://localhost:2368/ghost/api/v3/members/ # External Services (via proxy or direct)  
https://api.mailchimp.com/ https://api.trustpilot.com/ https://formspre.io/ https://cdn.onesignal.com/
```

Staging/Production

```
# Ghost Backend https://spaziocrypto.com # API Endpoints https://spaziocrypto.com/ghost/api/v3/content/  
https://spaziocrypto.com/ghost/api/v3/members/ # Cloudflare Worker  
https://spazio-multilang.ghostflow.workers.dev/
```

Environment Variables

Create `.env` or configure in Ghost settings:

```
# Ghost GHOST_URL=http://localhost:2368 GHOST_CONTENT_API_KEY=your_content_api_key
GHOST_ADMIN_API_KEY=your_admin_api_key # Newsletter (if using Mailchimp)
MAILCHIMP_API_KEY=your_mailchimp_key MAILCHIMP_LIST_ID=your_list_id # Forms
FORMSPREE_EMAIL=contact@spaziocrypto.com # Notifications ONESIGNAL_APP_ID_EN=your_en_app_id # ... (for
each language) # Tracking (optional) GTAG_ID=your_gtag_id
```

Common Issues & Fixes

Issue: Newsletter form not submitting

1. Check API endpoint is correct 2. Verify Content-Type header is 'application/json' 3. Check browser console for CORS errors 4. Verify email field is required and valid format

Issue: Paywall not showing for non-members

1. Verify Ghost Members feature is enabled 2. Check post has 'access' property set in Ghost 3. Verify Handlebars {{access}} tag is in template 4. Check member token is being passed correctly

Issue: Formspree submissions not working

1. Verify endpoint URL is correct 2. Check form method is POST 3. Verify form has name attributes on inputs 4. Check SPAM filtering isn't blocking emails 5. Verify email field is included

Issue: Language switching not working

1. Verify Cloudflare Worker is deployed 2. Check localStorage is enabled 3. Verify language codes match (en, de, es, etc) 4. Check URL includes language prefix

API Call Quota Estimates

API	Calls/Month	Limit	Status
-----	-----	-----	-----
Ghost Content API	~5,000-10,000	Unlimited	■ OK
Ghost Members API	~100-500	Unlimited	■ OK
Formspree	~50-100	50/month (free)	■■ May need upgrade
Trustpilot	~1,000	Unlimited	■ OK
OneSignal	~100	30,000/month (free)	■ OK
Mailchimp	~500-1,000	500/month (free)	■■ May need upgrade

****Note**:** For Formspree & Mailchimp, consider upgrading free plans as site grows.

Delivery Checklist

Before releasing to production, verify:

- ☐ All Ghost Content API calls tested and working
- ☐ Newsletter subscription functional on all pages
- ☐ Article paywall tested (free + paid versions)
- ☐ Contact forms submissions working
- ☐ Language switching functional
- ☐ OneSignal push notifications tested
- ☐ All forms styled + responsive
- ☐ Dark mode tested on all forms
- ☐ Error messages user-friendly
- ☐ No API keys in frontend code
- ☐ HTTPS enforced
- ☐ Performance meets Core Web Vitals
- ☐ Mobile testing complete (375px - 1440px)
- ☐ Staging server tested end-to-end
- ☐ Client approval on all pages
